

CROP SET[®]

For fruits and vegetables with strength and appeal

You want a hearty, appealing product. And, Crop-Set[®] delivers by helping to provide the essential nutrition plant's need to drive important metabolic processes. Those processes stimulate crop maturation and promote ideal market quality characteristics. Field trials support the existence of overall better crop appearance, quality and yield.

Crop-Set's unique bacterial extracts promote strong plant growth, including root development for more nutrient access. It comes in an easy-to-use formula, highly compatible in a tank mix and is a naturally-derived crop input.

Product Specifications

Brand Name	Crop-Set [®]
Category	Biological (crop development)
Active Ingredient	Bacterial fermentation extract, yucca extract, manganese sulfate, ferrous sulfate, copper sulfate
Crops	Fruits and vegetables including blueberries, citrus, flower/leaf/stem vegetables, melons, cucurbits, onion and bulb crops, pecans, potatoes, root vegetables, tomatoes, and soft fruit
Formulation	Liquid fermentation solution
Applications	At key crop development stages; can be applied with most traditional application programs
Rates	8.0 - 32.0 fl oz/A

Science Explained

Upregulates chlorophyll production, which provides the plant with energy needed to drive metabolic processes – processes that stimulate appearance, quality and yield.

Stimulates transportation of nutrients throughout the plant.

Helps a plant work more efficiently to achieve enhanced performance and stand up against in-season stressors.

APPLES

CITRUS

POTATOES

ONIONS

CROP SET®

REI	None
PHI	None
Restricted Use	No
Packaging	2 x 2.5 gal (36 cases/pallet), 264 gal totes
OMRI Listed	Yes

BACKED BY NUTRIGENOMICS

A plant's DNA contains the blueprint for all activity carried out by the plant, including growth, maturation, defense and more.

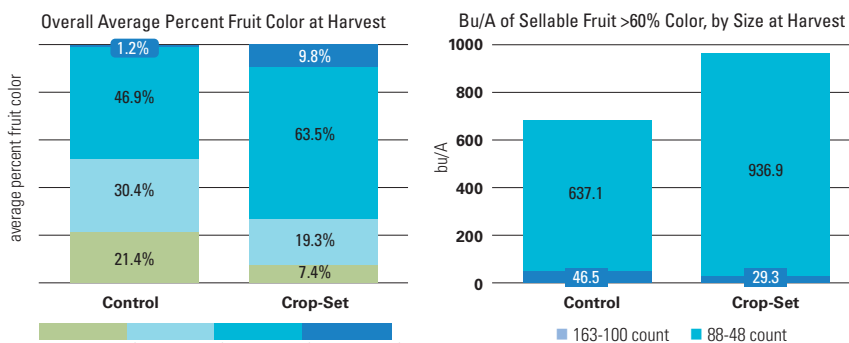

Alltech specializes in nutrigenomics, the study of how this natural genetic activity can be influenced via nutrition.

CONVENIENCE BENEFITS

Easy-to-use formulation that is highly compatible in tank mixtures, naturally derived (low toxicity) and has a low use rate.

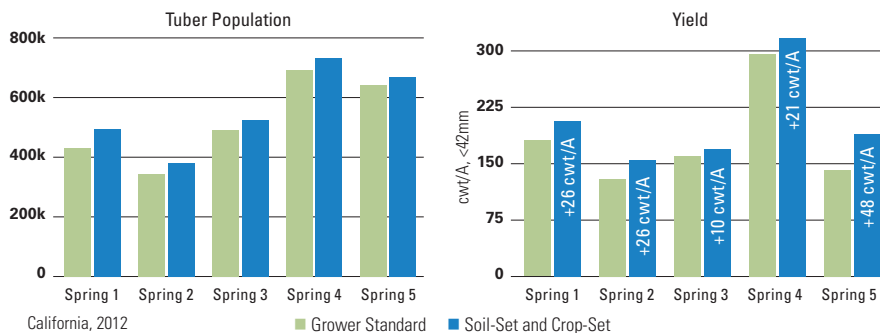

OMRI-listed formulation. Crop-Set is a naturally derived crop input with excellent crop and environmental safety. Specially formulated to meet consumer demands and organic growing practices.
