

NATURE'S BASICS[®] 2X

Feeding forage and oilseed crop potential

Nature's Basics[®] 2X provides the essential nutrition – and energy – needed to bolster a plant's metabolic processes and stimulate optimal crop production. Field trials support the existence of overall better crop quality and yield.

Nature's Basics 2X promotes strong plant growth processes, including root and shoot development for more nutrient access and stronger stems. It comes in an easy-to-use formula highly compatible in traditional tank mixes and is a naturally derived, safe crop input.

Product Specifications

Brand Name	Nature's Basics [®] 2X
Category	Biological (crop development)
Active Ingredient	Bacterial fermentation extract, yucca extract, zinc sulfate, boric acid, ferrous sulfate, manganese sulfate
Crops	Soybeans, cotton, peanuts, alfalfa
Formulation	Liquid fermentation solution
Applications	At key crop development stages; can be applied with most traditional application programs
Rates	10.0 fl oz/A

Science Explained

Naturally stimulates chlorophyll production, providing the energy needed to drive a plant's metabolic processes for optimal crop production.

Chlorophyll stimulates growth of more expansive roots and provides the plant with nutrition for continued growth.

Helps a plant work more efficiently to achieve enhanced performance and stand up against in-season stressors.

SOYBEANS

COTTON

PEANUTS

ALFALFA

NATURE'S BASICS® 2X

REI	None
PHI	None
Restricted Use	No
Packaging	2 x 2.5 gal (36 cases/pallet), 264 gal totes

BACKED BY NUTRIGENOMICS

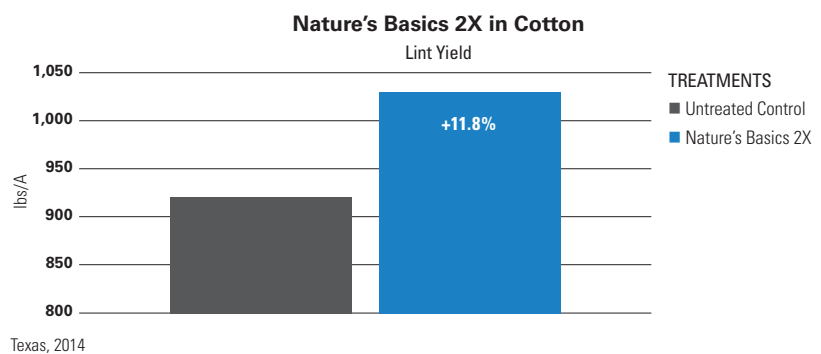

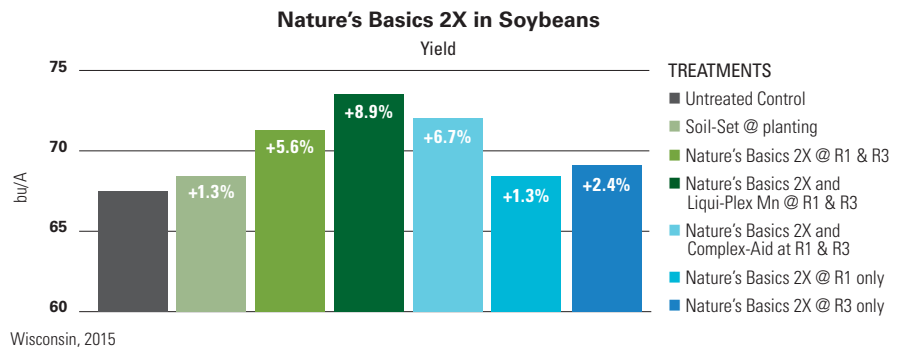

A plant's DNA contains the blueprint for all activity carried out by the plant, including growth, maturation, defense and more.

Alltech specializes in nutrigenomics, the study of how this natural genetic activity can be influenced via nutrition.

CONVENIENCE BENEFITS

Formula is highly compatible in tank mix, has a low use rate and is easy to use allowing for safe handling and application.

A naturally-derived crop input with excellent crop and environmental safety. Specially formulated to meet consumer demands and growing practices.
